

Anas Aouini

ICT Engineering Student

✉ anas.aouini@supcom.tn — ☎ +216 58 934 007 — linkedin.com/in/anas-aouini — github.com/anas-dev0

Education

Sup'Com (Higher School of Communication of Tunis)

Engineering Diploma in ICT

Tunis, Tunisia
09/2024 – Present

- Current Status: 2nd Year Engineering Student. Focus on Telecommunications, AI, and Software Engineering.

IPEIN (Preparatory Institute for Engineering Studies)

Preparatory Cycle (Math-Physics) — Ranked 86/1750

Nabeul, Tunisia
09/2022 – 06/2024

Professional Experience

TalentLink

Summer Intern

Tunis, Tunisia
Summer 2025

- Designed and developed a comprehensive University Management Platform using Django and React.

Leadership & Activities

IEEE Sup'Com Student Branch

Chairperson, Computer Society (CS) Chapter

Tunis, Tunisia
Present

- Leading the chapter's executive board in planning and organizing technical workshops and events.
- Spearheading initiatives to foster student engagement in computer science and technology.

Selected Projects

Jobify (Utopiahire) – TSYP 13 CS Project

2025

- Developed a real-time voice agent simulating technical interviews using LiveKit and Google Realtime API.
- Built a Resume Reader & Rewriter using Gemini and Prompt Engineering to analyze and improve CVs.
- Repository: github.com/anas-dev0

IndabaX Tunisia 2025 Website

2025

- Served as Technical Manager, developing a responsive website (indabaxtunisia.com/2025/) using HTML, CSS, and JS.
- Implemented SEO best practices and ensured cross-browser compatibility.

Mealy – AI-Powered Cooking & Nutrition App

2026

- Built a mobile app using Flutter, Flask, and Firebase that generates recipes from fridge items and tracks nutritional intake.
- Developed a food photo recognition feature that uses AI to calculate calorie content from a picture of a meal.
- Implemented a shopping receipt scanner that detects nutritional items and automatically adds them to the user's fridge.
- Repository: github.com/Tarekazabou/mealy

Competitions & Hackathons

CSTAM 2.0 Technical Challenge

2025

- Awarded **2nd Place** with team “Enough thinking”. Developed a chatbot using prompt engineering and ollama; created a nutrition-facts service from food pictures.

Orange AI Hackathon – AI for Telecom Innovation

2025

- Awarded **1st Place** in the Churn Challenge. Built an AI model to predict customer churn for the following month, enabling proactive retention strategies.

Skills & Certifications

- **Certifications:** Machine Learning Specialization (Coursera), CCNA 1, Fundamentals of Deep Learning (Nvidia), Fundamentals of Accelerated Data Science (Nvidia), Enhancing Data Science Outcomes With Efficient Workflow (Nvidia).
- **Programming:** Python, C++, TypeScript, SQL, HTML, CSS.
- **Frameworks & Tools:** FastAPI, React, LiveKit, LangChain & LangGraph, PyTorch, Docker, Docker-compose, Git/GitHub.
- **Languages:** Arabic (Native), English (Fluent), French (Fluent), German (Beginner).
